Hospitals are slowly beginning to transition their COVID-19 specific units back to “normal operations.” Many still do have at least one COVID-19 cohort area, but the increase in non-COVID-19 patients is necessitating a reduction in COVID dedicated surge areas.

CDPHE disseminated a [press release](#) indicating that there is going to be an increase in cumulative hospitalizations across the state. This is due to the completion of investigations on known cases, not due to new hospitalizations. The change is the result of a new process for investigations that matches and updates past hospitalization data to known cases.
