## **I. Introduction**

The Internal Audit Division recognizes that an overall audit strategy and plan is important to meet the goals and objectives of the division as they contribute to the mission of the Office of the Auditor. The division also agrees with professional standards developed by the Institute of Internal Auditors, which recognize that an annual audit plan and work schedule benefits the organization by:

- Providing an identifiable basis for the role of the Internal Audit Division and justification for obtaining budgetary funds and approval.
- Establishing what agencies, contracts, or other areas will be prioritized for audits on an annual basis.
- Permitting an efficient allocation of limited resources.
- Providing a flexible basis for managing audit personnel.
- Projecting an estimated timetable for initiating and completing audits for the year.
- Eliminating the potential for overlapping audits within the division and with other audit organizations.

Audits to perform are selected using an approach that is based upon risk assessment. We apply our accumulated knowledge of auditee operations and internal controls from past audits to identify audits of high priority in the annual plan.

Risk assessment is a process used to assign a number or score to potential audits based upon specific risk factors related to an entity's operations, internal controls, and estimated liability to the City and County of Denver. Examples of risk factors used to formulate the audit plan include dollar amounts of revenue, complexity of operations, quality of internal controls, time since last audit, and management accountability. The complete list of risk factors and the assessment process are described further in this document.

The development of an annual audit plan, using risk assessment as an integral component is a dynamic process. Throughout the year, the division's audit staff has the opportunity to obtain current information about agencies and contractors for use in the risk assessment process. The risk factors and scoring process are annually reviewed and refined as needed. The risk assessment process is applied to potential audits such as contracts, specific financial statement accounts, transaction cycles, grants, business processes, programs or other areas deemed necessary.

## **II. Principles for Audit Plan Development**

In order to provide practical guidance and an authoritative framework for the development of this annual audit plan, the following basic principles are recognized and observed:

- In the audit plan, consideration is given the unique interests and responsibilities of the Auditor as an elected official of the City and the need to incorporate a risk factor that, when applied to a particular audit, would supersede proposed audits with higher risk scores.
- The approach to developing an annual audit plan recognizes the fact that audit resources of personnel and dollars are limited, thus prohibiting one hundred percent audit coverage each year. This limiting factor is inherent in the concept of utilizing risk assessment to help prioritize audits.
- The audit plan gives consideration to work performed by other auditors.
- The audit plan gives consideration of those audits which may be mandated by grant provisions or City statute, such as in the case of the petty cash audit.
- The risk assessment criteria used in the ranking of the audit universe places an emphasis on perceived or actual knowledge of the auditee's system of internal controls. Consideration was also given to the internal controls and management accountability of the City agencies responsible for administering and enforcing contract provisions for revenue contract auditees.
- The audit plan has been developed with an awareness that there are inherent risks and limitations associated with any method or system of prioritizing audits. The risk factors and scoring process are periodically evaluated and modified, if necessary, in order to improve the audit plan.
- At present, the risk assessment factors used in selecting annual audits are designed in conjunction with the objectives of auditing City agencies, business' processes, and revenue contracts. In general, audits of City agencies entail the evaluation of internal controls and the propriety of financial statement assertions; business' process reviews include performance aspects related to operational efficiency and effectiveness; while the objectives of auditing revenue contracts are focused on compliance with contractual requirements.

### **III. Audit Universe**

The first step leading to development of the audit plan is to establish an audit universe representing the total population of potential audits with similar characteristics. The primary audit universe includes City agencies, revenue contracts, performance audits, and certain other projects or audits. The revenue contracts were separated between those connected with Denver International Airport and those monitored by other City agencies, primarily General Services and Parks and Recreation. Other potential audit segments of the universe such as business processes, expense contracts, or functional areas that may cross over operational units are also recognized. Examples of these other segments are:

- Organizational units within an agency such as a division or a department;
- Transaction cycles or items common “horizontally” across a significant section of the universe, such as payroll, contract compliance issues, personal service contracts, grants, etc.
- Individual financial statement accounts such as fixed assets or leave liability;
- Performance or operational audits;
- Fraud and defalcation audits.

In the final analysis, the risk assessment factors were applied to all major fund/orgs. within City agencies, revenue contracts associated with Denver International Airport, revenue and management contracts monitored by City agencies other than DIA, and other audit segments or projects.

#### IV. Audit Prioritization and Selection

The *objective* of the process of risk assessment is to identify and prioritize audits posing the greatest potential risk and liability to the City. This process provides a tool to assign available audit personnel to perform audits for the purpose of reducing the risk and liability exposure to the City. In order to obtain a priority listing of potential audits, a risk-assessment approach is used to rank each of the potential audits in the universe.

The individual *risk factors* used to evaluate the audits were originally selected from almost one hundred possibilities offered through professional literature and other governmental audit plans reviewed. Eleven risk factors, explained on pages 6 through 9, were selected on the basis of relevance with respect to the nature and objectives of our audits and the political and reporting environment in which we operate. Additional guidelines presented on pages 11 and 12, assist in the risk evaluation process.

For each of the risk factors, members of the audit staff evaluated the associated risk and ranked them in one of five possible risk levels, with the first level assigning little significance (i.e., a very low exposure) to the fifth level assigning the highest level of risk (i.e., a very high exposure). In situations where we had little or no specific knowledge of a particular risk factor, we assigned a neutral rating of five. In the case of revenue contracts where risk factors may be affected by both the contractor and one or more City agencies, the evaluators judgmentally weighed the risk factor in relationship to each parties' level of responsibility.

The Plan accounts for the relative measure of importance between each of the risk factors and the resultant impact on the overall risk score for each audit by weighting each risk factor. A "weighting" factor was derived by having evaluators perform a comparison of each specific risk factor with all the other risk factors on a "more important than" basis.\* The combined evaluators' "pair-wise comparison" worksheet and resultant weight factor is presented on page 14. The effect of the weight factor is evident in the sample *Risk Calculation Worksheet* on page 5.

For each potential audit or segment within the audit universe a "risk calculation worksheet" was prepared to produce a total risk score, see example illustrated on page 5 (e.g., **Citywide Workers' Compensation**). The potential audits were ranked based upon highest to lowest total risk scores thereby producing an audit priority listing. Accordingly, the audit universe and segments were combined to generate the overall Audit Universe List with scores presented on pages 15 through 22.

---

\* The individual evaluators' "pair-wise comparisons" were combined to give a comprehensive ranking of the most important risk factors which result in a related weight factor for each of the risk factors. For example, referring to page 14, the evaluators, as a whole, considered the Quality of Internal Control System to be the most critical risk factor resulting in a weight factor of 16.9, while Age of Operations was determined to be less critical than any other risk factor as evidenced by a weight factor of 3.6.

**IV. Audit Prioritization and Selection - continued**

The risk factors chosen for evaluation purposes are as listed within this sample Risk Calculation Worksheet:

<b>Sample Risk Calculation Worksheet - (Citywide Workers' Compensation)</b>			
<b>Risk Factor(s)</b>	<b>Weight *</b>	<b>Risk Level Points*</b>	<b>Risk Score *</b>
<b>1. Size of Unit:</b>

None.	0.00
One or two locations or units.	.75
Three to five separate locations or units.	1.25
Six to ten separate locations or units.	1.75
Eleven or more separate locations or units.	2.25
	_____
Sub-total of Points for Size of Unit:	3.00

**2. Liquidity and Negotiability** - a measure of the exposure to potential loss or embarrassment due to the cash nature of transactions, or the ease or difficulty of assets within scope of audit being converted to cash.

Type of Transactions and Assets:	Risk Level
None.	0
Minimal amounts of cash transactions or assets are difficult to convert to cash.	3
Moderate amounts of cash transactions or assets are easy to convert to cash.	5
Nature of operation is primarily cash or assets are very easy to convert to cash.	7
Cash.	9

**3. Compliance with Regulations** - a measure of exposure to loss, embarrassment, or regulatory sanction due to complexity and volume of regulations, or penalties for noncompliance.

Regulations:	Risk Level
None.	0
Few regulations and little risk of noncompliance.	3
Either substantial regulations or penalties.	5
Substantial volume of regulations with substantial penalty.	7
Heavily regulated with serious ramifications for noncompliance.	9

**4. Public Exposure** - a measure of exposure to loss or embarrassment caused by the level of visibility and/or public interest in conjunction with financial exposure.

Level of Visibility:	Risk Level
No media exposure risk, very low visibility, and no financial risk.	0
The nature of operations have some public interest, low visibility, and little financial risk.	3
Operations with high public interest, medium visibility, and some financial risk.	5
Operations with strong public interest, significant financial risk, and high visibility.	7
High visibility operation, intense public interest, and material financial risk.	9

**5. Complexity of Transactions** - a measure of the exposure to loss or embarrassment due to the nature and process of recording transactions and maintaining account balances.

Level of Complexity:	Risk Level
None.	0
Transaction recording and account balance maintenance is simple and routine.	3
Transaction recording and account balance maintenance are moderately simple and require limited judgement.	5
Transaction recording and account balance maintenance is fairly complex in nature and require some professional accounting judgment.	7
Transaction recording and account balance maintenance is very complex in nature and require significant professional judgment and expertise.	9

**6. Management Accountability** - a measure of how exposure to loss or embarrassment has been mitigated by auditee's level of receptiveness and implementing previous recommendations.

<b>Level of Accountability:</b>	<b>Risk Level</b>
Management is receptive and has implemented past recommendations.	0
Management is moderately receptive and implements some recommendations.	3
Management avoids recognition and implementation of recommendations.	5
Management only recognizes and implements recommendations as a result of pressure from external sources.	7
Management exhibits a lack of receptiveness and responsibility to implement recommendations.	9

**7. Quality of Internal Control System** - a measure of how exposure to loss or embarrassment has been mitigated by good internal controls.

<b>Internal Controls:</b>	<b>Risk Level</b>
Excellent accounting and administrative controls exist and are practiced.	0
Significant accounting and administrative controls exist with minor weaknesses.	3
Some accounting and administrative controls exist and significant weaknesses exist.	5
Few accounting and administrative controls exist and major weaknesses exist.	7
Administrative and accounting controls do not exist and critical weaknesses exist.	9

**8. Age of Program or Operation** - a measure of how exposure to loss or embarrassment has been affected by changes in operation, organization, accounting system, personnel, or source of authority.

<b>Time in Operation:</b>	<b>Risk Level</b>
Program or operation has no changes since previous audit.	0
Program or operation exhibits minor changes since previous audit.	3
Program or operation has one or more significant changes since previous audit.	5
Program or operation has experienced major changes since previous audit.	7
Program or operation is operating under a completely new framework of operation, organization, personnel, accounting system, and source of authority.	9

**9. Time Expired Since Last Audit** - a measure of how exposure to loss or embarrassment has been mitigated by the frequency level of internal or external audit.

<b>Frequency:</b>	<b>Risk Level</b>
Continuous annual audits performed consistently.	0
Generally the activity or operation is reviewed every other year.	3
Generally the activity or operation is reviewed within a three-year cycle.	5
Last audit performed was over four years ago.	7
Last audit performed was more than five years ago.	9

**10. Management Experience** - a measure of the experience of management and its effect on limiting exposures.

<b>Experience:</b>	<b>Risk Level</b>
Management has exceptional experience.	0
Management has good experience. There are no perceived problems worthy of concern.	3
Management experience is satisfactory, there are no major problems, but some areas of concern.	5
There is evidence of a lack of experience by management that is cause for concern.	7
Management's lack of experience has clearly and repeatedly proved to be a serious problem.	9

**11. Manager Override** - As Manager of the audit organization, I hereby override the calculated priority score and declare this an audit of the highest priority by providing an overall score in points of: 9

Manager's Signature: \_\_\_\_\_

Date: \_\_\_\_\_

## **V. Preparing the Annual Audit Plan**

The objectives of the annual planning process are to determine what audit activities will be scheduled for the year and help ensure qualified audit staff are assigned to the highest priority assignments. The principles and procedures discussed in this document have been developed to provide a process for fulfilling these objectives.

The individual entities or activities within the audit universe are risk rated using the process described in Sections III and IV on an annual basis by the Internal Audit Division audit supervisors. Taken into account is input from the Internal Audit staff, and to a lesser extent, the Audit Committee and City management. A schedule of responsibilities and timetable for action steps is presented in Attachment B providing general guidance for finalizing the annual audit plan. Special emphasis by all audit staff should be placed on the following areas throughout the year:

- Maintaining an accurate audit universe listing.
- Maintaining current and relevant information on contractors, grants, and City agencies related to the risk factors.
- Understanding the risk assessment process to complete a Risk Calculation Worksheet at the completion of an audit or as new information on an auditee becomes available.
- Maintaining accurate time summaries for audits and providing a reliable basis for determining hours available to perform scheduled audits.

The final step to complete the annual audit plan is to estimate the number of available staff hours in the year and apply these to the estimated hours needed to complete selected audits and projects. The results of the 2004 and 2005 Annual Audit Plan are presented as Attachment E along with the estimated time allocation for audits and projects.

Actual scheduling may be affected by personnel turnover, audits requested by the Auditor, special projects, and unforeseen circumstances in a scheduled audit. In keeping with our current policy, the actual status of each audit, in terms of percent of completion, is conveyed to the Director and Deputy Director via monthly time budget status reports, at monthly meetings, and when the annual individual audit work plans are prepared.

*Attachment A: Supplemental Guidelines for Completing the Risk Calculation Worksheet.*

1. Size of Unit:

1.1 Total Value of Assets - Value of assets should be only those assets under the control of the agency. For example, in the CAFR, there may be buildings and improvements recorded by an agency for which it has little or no control. Consideration should be given to all types of funds and assets controlled and accounted for by the organization.

1.2 Total Annual Revenues and/or Expenditures/Expenses - Include all revenue and expenditure/expense amounts for the organization.

1.3 Average Outstanding Balance of Accounts Receivable or Payable - Recorded and unrecorded amounts need to be considered for this factor as some agencies track their own accounts that may not be recorded in PeopleSoft.

1.4 Number of Locations, Contracts, or Units - Consider the areas where accounting transactions are being made. Consider situations where activities are at different locations.

2. Liquidity and Negotiability - Consider the amount of cash collected as compared to the amount of business transacted by other means. Consider risks associated with the size, type and nature of existing equipment, supplies, and inventories (i.e., determine existence of valuable small equipment).

3. Compliance with Regulations - Consider the nature and number of grants, ordinances, Fiscal Rules, Executive Orders, Charter, Career Service Rules, and contract conditions that the entity is responsible to comply with and/or monitor.

4. Public Exposure - Evaluate exposure for this factor based on current interest as well as potential future interests of the media and public associated with the organization or program.

5. Complexity of Transactions - Consider the evaluation of contract terms and conditions as well as the nature of grant program activities when determining complexity of transactions.

6. Management Accountability - Consider management's implementation of past recommendations from internal and external sources. Review follow-up responses made by management to past audit reports. Consider the effect of managerial changes that may have occurred since the last audit. Also, consider the past level of cooperation and responsiveness of management in general.

*Attachment A: Supplemental Guidelines for Completing the Risk Calculation Worksheet  
– continued.*

7. Quality of Internal Control System - The evaluator should consider all internal controls for this risk factor and not selectively use only the weak or strong controls that may be known. Accordingly, risk factors that relate to potential misstatements arising from fraudulent financial reporting should be considered for management's characteristics and influence over the control environment, industry conditions, operating characteristics, and financial stability.

8. Age of Program or Operation - Consideration should be given to any changes in the nature of the auditee's purpose, product, or function; change in the organizational structure, such as public to private, fund type, or legal status (sole proprietor to corporation or partnership); change in accounting system or method, such as cash to accrual, or point of sales to inventory for retail operations; the addition or separation of personnel such as owner, principal, head of accounting or finance, agency head or appointing authority, or operations manager; a change, addition, deletion in the entity's primary source of authority, such as a contract amendment, new ordinance, charter section, executive order, or applicable federal or state statute.

9. Time Expired Since Last Audit - Consider the timing of the last audit performed by the Internal Audit Division, as well as any external audit reports available. Consider the level of reliability for various types of certified financial statements that may be available or required based on contract conditions or other reasons. Consider the extent, nature, materiality and purpose of past audit scopes and findings.

10. Management Experience - Consider management's background, time in service and level, type and nature of experience.

11. Manager Override – See page 9.
