
DAA Partner Directory and Youth Program Locator

The DAA Partner Directory and Youth Program Locator serve as the core of the DAAconnect platform and the main functionality for usage of the system.

The DAA Partner Directory is the provider-to-provider resource for youth service organizations, schools and other youth professionals to connect with one another, as well as identify services and potential future partnerships.

The Youth Program Locator is the public-facing tool (on the City and County of Denver's website) where families and the general public can search for quality youth programs in and around Denver. Families and caregivers are able to customize their searches with a variety of filters, such as age, interest, location, cost and more.

Requirements to use this DAAconnect feature:

- A Registration Form must be completed and approved
- Organizations must update profiles at least three times per year, or as often as needed to keep program schedules current
