What type of organization do you represent?
(Choose up to 2)
How many full-time staff does your organization employ?
Please use the slider to indicate the importance each of the six allowable uses to your community.
How important are each of these outcomes?

- An environmentally just Denver: 3.7
- Meeting our climate GHG reduction goals: 4.4
- Reducing local air pollution other than GHG: 4
- Adaptability to a changing climate: 4
In one word, what does success for the Fund look like?
What is one project you would like to see funded in year 1 of the CPF? (10 words or less, please)

- Westwood Via Verde greenway
- Mentoring community leaders to start initiatives they choose
- Centrally located public DC fast charging for EVs
- Housing density
- Pollinator Corridors
- Programs focused on youth
- More household renewables (solar + EVs)
- Reducing the amount of heavy plastics in landfills
- E charging stations
What is one project you would like to see funded in year 1 of the CPF? (10 words or less, please)

- Weatherization upgrades low-income homes
- Energy upgrades for low-income, BIPOC, people with respiratory illness
- Batteries for all Community Solar projects

- Mobility hubs with electric carshare vehicles and bikes
- Help organizations implement Denver’s new building codes and make buildings better for the climate
- EV charging stations

- More EV charging stations
- Stakeholder engagement in vulnerable / under-resourced neighborhoods
- Green infrastructure with multiple benefits
What is one project you would like to see funded in year 1 of the CPF? (10 words or less, please)

- Electrification partnered with State weatherization dollars
- Insulating every building in Denver
- Travel training to get people onto public transit & out of SOVs
- Affordable green housing
- Trees and green space
- Energy efficiency retrofits for low income homes.
- Electrification of affordable housing units with collaboration from Xcel to keep utility costs down.
- Housing support
- Improved RTD bus routes and electrification of buses.

What is one project you would like to see funded in year 1 of the CPF? (10 words or less, please)

- Public education re switching from gas to electric in homes; new green codes that incorporate green infrastructure (water management and conservation)
- Large scale tree planting in older, low income neighborhoods that have lost them over the years. Shade for homes is least expensive way to lower energy consumption and revitalizes and beautifies areas
- Fund heat pump conversions to be at the same cost of traditional furnaces in low income homes
- Youth education and advocacy programs
- Affordable net zero ADUs
- Hydrogen fueling for fuel cell EVs. Not everyone can charge overnight.
- Energy efficiency
- Small community solar
- Diversifying the sustainable work force
What is one project you would like to see funded in year 1 of the CPF? (10 words or less, please)

- EV infrastructure
- Replacement of heavy-duty diesel with electric vehicles
How do these projects rank on equity and GHG impacts?

1. Electric Bikes for Essential Workers
2. Community Solar (Municipal & Income-qualified subscriptions)
3. Green Job Training
4. Income-qualified Home Energy Retrofits
Indicate how much you agree with the possible strategies for how to use the Climate Protection Fund.

- Large-scale infrastructure project (Ex. neighborhood district energy) which could take 50% of the fund in a given year. 3.6
- Create a reserve from early years that can be spent on something big in later years. 2.4
- Marketing campaigns focused on education, awareness, behavior change, etc. 2.9
- Micro-funding of $10K per organization. 3.1
Please indicate the type(s) of funding that would be most helpful to your organization.
What is an optimal contract term for funding?
