

# COVID-19 VACCINE REQUIREMENTS: What You Need to Know

**All employees, volunteers, and contractors must be fully vaccinated by Sept. 30, 2021.**

To be fully vaccinated by the deadline, individuals covered by the City and County of Denver's vaccine requirement will need to receive their final dose of the vaccine by Sept. 15.

**In Denver, the following staff are required to be fully vaccinated:**

- Staff working in high-risk congregate settings including long-term care facilities, hospitals, shelters, correctional facilities, and schools
- Home healthcare workers
- First responders
- All City and County of Denver employees

The COVID-19 vaccine protects against severe cases of the novel coronavirus, including the Delta variant. Vaccines are free and readily available, and no documentation or insurance is needed.

**We can protect ourselves, our co-workers, our families, and our communities against the deadly effects of COVID-19 and finally return to normal. Vaccines save lives and provide a path to end this pandemic. Thank you for doing your part.**
