Dear Resident:

Denver is upgrading the temporary Shared Street installed this summer to improve safety and function better in the winter. These changes will make walking, bicycling, and driving safer and more comfortable, advancing the vision for E. Bayaud Ave. determined through the South Central Community Transportation Network. The safety improvements will be implemented in January 2021, and include:

- **Curb extensions** to reduce pedestrian crossing distances and slow vehicles. No parking zones extended to improve visibility and safety.
- **Intersection traffic modifications** at S. Lincoln St. & E. Bayaud Ave. and S. Emerson St. & E. Bayaud Ave. (see Figure 1 & 2). These travel modifications will prioritize local traffic and make the street safer and more comfortable for walking, rolling, and driving. To make these changes, parking will be pulled back/reduced at these intersections.
- **Traffic circles** to slow vehicles along the street, increasing safety.

WHAT’S A SHARED STREET?

To help mitigate the effects of COVID-19, Denver has created Shared Streets across the city to support physical distancing and make it safer for everyone to move around the neighborhood. Shared Streets are designed to deter non-local vehicle trips and reduce speeds to create a safer environment for all ages and abilities to use the street for recreation and mobility while we’re staying closer to home.

Everyone is allowed to use a Shared Street, including people walking, running, rolling and driving slowly.

SHARED STREETS BY THE NUMBERS

- Used by 10,000+ people a day during the summer
- On average, walking and rolling use was 287% higher
- On average, vehicle trips were 77% lower
- On average, vehicle speeds were 28% slower

SHARED STREETS UPDATE

To continue operating the Shared Street initiative through the winter, Denver will be updating locations and material configuration to withstand the elements and improve safety. The new materials will be temporary in nature and vary depending on the Shared Street. Improvements will start late 2020 and continue into early 2021.
