Ballot content is certified by the Colorado Secretary of State 60 days before Election Day. The Denver Elections Division then creates the election in a tabulation system.

Files are sent to the print vendor for production.

Tablet ballots are set up and the Denver Elections Division conducts a public Logic and Accuracy Test.

Election judges prep ballots for sorting which are then date- and time-stamped.

Signatures are verified.

Ballots are scanned and imprinted with a number used to conduct risk-limiting audits.

AND FINALLY,

Results are tabulated beginning at 7 p.m. on Election Day. Unofficial results are sent to the Secretary of State and posted publicly. In the weeks following, a risk-limiting audit is performed to ensure accuracy, and a bipartisan canvass board certifies the results.

Ballots are scanned and prepared for counting.
