YOUR CITY.

PROJECT
SUMMARY
SHEET

CITYWIDE BIKE INFRASTRUCTURE

PROJECT BACKGROUND

Denver is improving its roadways to move more people safely and efficiently through the city, and is working to complete networks that offer people more options to get around town in ways that meet their day-to-day needs. As part of this effort, Denver is accelerating implementation of its citywide bike plan, Denver Moves: Bikes.

This project will devote \$18 million to installing new bikeways over the next five years. Installation will be phased throughout the bond's lifetime.

High comfort bikeways provide:

- Dedicated space on the street for people who drive cars and ride bikes
- Street designs that lower the stress of riding and reduce potential conflicts between bikes and vehicles
- A convenient and more viable way for people to get around safely
- Better connections to the places people want to go, such as schools, parks, trails and transit

PROJECT INFORMATION

Location: Citywide

District: Citywide

Neighborhood: Citywide

Elevate Denver Funded Amount: \$18 million

Designer: Varied

Contractor: Varied

PROJECT BENEFITS

Enhanced viability for bikes as a safe transportation option

Updated and expanded bike infrastructure

Increased safety and mobility

Improved mobility equity and options
