**PROJECT
SUMMARY
SHEET**

CITYWIDE SIDEWALK CONSTRUCTION

PROJECT BACKGROUND

Denver has 355 miles of missing sidewalks. In 2018, Denver’s Sidewalk Gap Program began to fill these sidewalk gaps and create a complete sidewalk network, enabling pedestrians to safely access their destinations.

As part of Denver’s larger citywide sidewalk program, the Citywide Sidewalk Gap program will improve pedestrian infrastructure in neighborhoods with missing sidewalks around the city, creating a safer walking, running and biking environment. New locations will be constructed in accordance with the Denver Moves: Pedestrians

and Trails plan, focusing on and near streets with high levels of crashes (the City’s Vision Zero High Injury Network), filling in gaps near transit connections, and creating new connections to important community destinations, such as schools, parks and grocery stores. This program will be phased throughout the bond’s lifetime.

PROJECT INFORMATION

Location: Citywide

District: Citywide

Neighborhood: Citywide

Elevate Denver Funded Amount: \$ 30.7 million

Designer: Varied

Contractor: Varied

PROJECT BENEFITS

Increased pedestrian safety, mobility and accessibility

Enhanced connectivity between neighborhoods and transit

Phased construction allows focus on school and other safety priority routes
