FIRE STATION REPAIRS & IMPROVEMENTS

PROJECT BACKGROUND

The Denver Fire Department has many fire stations that are more than 40 years old and need crucial upgrades. As a round-the-clock operation, fire stations experience wear and tear from high use. Most stations house up to eight firefighters per shift and 16 firefighters during shift changes. In between calls, firefighters eat, sleep and spend their 24-hour shifts in their firehouse.

This project will repair and improve 19 fire stations (half of Denver's 38 fire stations) with updated equipment, bathrooms and living spaces to ensure better functionality, safety and gender equity. It will update equipment, restrooms, kitchens and living spaces to create functionality and comfort for employees and visitors. As a separate project, a new fire station will be built at 72nd and Tower Road to meet the needs of our growing city and improve emergency response times.

PROJECT INFORMATION

Location: Citywide

District: Citywide

Neighborhood: Citywide

Elevate Denver Funded Amount: \$4.6 million

Designer: Varies

Contractor: Varies

PROJECT BENEFITS

Critical repairs and improvements at 19 fire stations

Updated equipment, restrooms, kitchens and living spaces

Increased safety and functionality

Maximized space efficiency and community support
