PARK MAINTENANCE FACILITY IMPROVEMENTS

PROJECT BACKGROUND

The Denver Parks and Recreation system spans over a 148-year history, from the first park created in 1868 to nearly 20,000 acres of urban parks and mountain parkland today. These facilities are unrivaled in the Rocky Mountain West, but many of the park operations and maintenance facilities are in poor physical condition, lacking interior space, storage and adequate technology.

This project includes improvements for staff safety and facility functionality; newly constructed facilities; additional work space and remodeled existing facilities for expanded use; additional staff; expanded staff parking, staff restrooms/lockers/breakrooms and storage for equipment, vehicles and materials; and updated electrical panel, fire alarms and HVAC equipment.

PROJECT INFORMATION

Location: Multiple

District: Citywide

Neighborhood: Varies

Elevate Denver Funded Amount: \$2 million

Designer: Varies

Contractor: Varies

PROJECT BENEFITS

Newly constructed facilities

Additional work space and parking for staff

Upgraded electrical, fire alarms and HVAC
