CITYWIDE DEFERRED MAINTENANCE PROGRAM | STREET PAVING

PROJECT BACKGROUND

This citywide program focuses on arterial and collector road repaving and curb and gutter improvements. This project ensures that neighborhoods across the city will see major paving and concrete work occur, fixing potholes, improving traffic flow, and reducing wear and tear on vehicles.

Street paving in Denver has been historically underfunded. Past funding levels have fallen short by roughly 150 lane miles per year, creating a current backlog of approximately 875 lane miles. This project will improve road conditions as program funds are expended, with approximate rise in the Pavement Condition Index (PCI) from 64.2 at the end of 2018 to 70.0 at the end of 2022.

Along with addressing 356 lane miles of paving needs on arterial and collector streets, the repaving effort will be phased to coordinate with other major projects such as utility work, multimodal improvements or other bicycle route expansion projects.

PROJECT INFORMATION

Location: Citywide

District: All

Neighborhood: All

Elevate Denver Funded Amount: \$45 million (paving);
\$11 million (curb & gutter)

Designer: Varied

Contractor: Varied

PROJECT BENEFITS

Preserved infrastructure

Improved maintenance

Reduced vehicle wear and tear
