PROJECT  
SUMMARY  
SHEET

# YALE STATION PEDESTRIAN IMPROVEMENTS

## PROJECT BACKGROUND

Pedestrian access to the Regional Transportation District’s (RTD) Yale Station from the residential neighborhood to its south is limited and the heavy traffic on Yale Avenue makes it difficult for bus drivers to turn onto the access road to the station.

This project will address both these problems. The project will signalize the intersection of Yale Avenue and Yale Circle and provide a pedestrian refuge median. These two project elements will improve pedestrian safety and access to the Yale Station from the south, while also making it safer and easier for buses to access the station.

## PROJECT INFORMATION

Location: Yale Station (I-25 and Yale Avenue)  
District: 4  
Neighborhood: Southeast Denver  
Elevate Denver Funded Amount: \$1.2 million  
Designer: Jacobs  
Contractor: Sturgeon Electric

## PROJECT BENEFITS

Improved pedestrian safety and connectivity  
Integrated needs of local residential neighborhood and regional transit center  
Increased transit access  
Improved transit bus operations
