This class is distinguished from a Staff Assistant that performs administrative and technical level work assisting professional staff in the execution and application of a specific administrative function(s) to the operations of an organization.

The Business Operations Administrator is also distinguished from the Administrator I class that performs a variety of specific administrative activities/projects of limited scope in a specialized, functional area which requires a thorough foundation in the principles and practices of the functional area in order to maintain and improve the efficiency and effectiveness of the function and provide supportive, interpretive, and advisory information to higher level administrators, managers, and/or other stakeholders.

The Business Operations Administrator is distinguished from the Program Administrator in that a Program Administrator performs full performance professional level work implementing, administering, and developing program activities and functions and provides technical expertise to program staff, other agencies, the community, and program participants. A Program Administrator administers a program that is defined as a specialized area with specific components that include its own policies, procedures, goals, objectives, budget, and tasks that distinguish it from the main body of a department/agency. A program may complement the core goals and objectives of an agency/department but it is separate from the functional areas that support the core goals and objectives.
