

Office of Human Resources
IT Web Administrator Associate - CI3085

THIS IS A PUBLIC DOCUMENT

General Statement of Duties

Performs standard level information technology work ensuring the consistency and accessibility of the city's internet and intranet; developing technical solutions and web tools to enhance web usability, website architecture, and search engine optimization; tracking and monitoring system activities; and developing and maintaining standards and guidelines for website style and content.

Distinguishing Characteristics

The IT Web Administrator Associate works within set information architecture and user experience framework, develops online content and web pages for Denvergov.org, and supports department and agency staff with editorial and technical expertise.

The IT Web Administrator Associate is distinguished from the Content Developer, which provides content development support to department or agency staff, prepares department web pages and applications for web sites, and coordinates and provides editorial and technical support in this area to departmental staff.

The IT Web Administrator Associate is distinguished from the IT Web Administrator Senior, which performs full performance professional information technology work ensuring the consistency and accessibility of the city's internet and intranet; developing technical solutions and web tools to enhance web usability, website architecture, and search engine optimization; tracking and monitoring system activities; and developing and maintaining standards and guidelines for website style and content.

Essential Duties

Coordinates and manages the city's internet and intranet to ensure consistency and accessibility characterized by interactive services, editorial integrity and technical training for users in technology, current business models and marketing strategies.

Works with developers and system administrators to ensure effective interaction design and interface design with web applications.

Researches industry best practices on information delivery (to the end user) and develops technical solutions and web tools to enhance web usability, website architecture, and search engine optimization.

Identifies and tracks system activity, including search mechanisms, content errors, and referring sites, then monitors and reports trends such as access frequency and volume of information published.

May develops and maintains standards and guidelines for website style and content, based on industry best standards, to meet the needs of users, designers, and technical staff; creates and maintains web based training on style and content standards.

Assists with the coordination in writing and editing of online content with authors and content developer to ensure presentation and content standards follow web usability, user experience, accessibility, and industry best practices.

Assists with recommendations for improvement to the website to enhance the city's marketing and communication goals; develops technical processes needed to implement website improvements.

May participate in special marketing and communication campaigns for the city by developing strategies to effectively deliver information to the end user through the city's website.

Performs other related duties as assigned or requested.

Any one position may not include all of the duties listed. However, the allocation of positions will be determined by the amount of time spent in performing the essential duties listed above.

Competencies

Attention to Detail – Is thorough when performing work and conscientious about attending to detail.

Creative Thinking – Uses imagination to develop new insights into situations and applies innovative solutions to problems; designs new methods where established methods and procedures are inapplicable or are unavailable.

Decision Making – Specifies goals and obstacles to achieving those goals, generates alternatives, considers risks, and evaluates and chooses the best alternative in order to make a determination, draw conclusions, or solve a problem.

Oral Communication - Expresses information to individuals or groups effectively; taking into account the audience and nature of the information; makes clear and convincing oral presentations; listens to others, attends to nonverbal cues and responds appropriately.

Reading – Understands and interprets written material, including technical material, rules, regulations, instructions, reports, charts, graphs, or tables; applies what is learned from written material to specific situations.

Technical Competence – Uses knowledge that is acquired through formal training or extensive on-the-job experience to perform one's job; works with, understands, and evaluates technical information related to the job; advises others on technical issues.

Written Communication - Composes, reviews, edits, and issues written materials for diverse audiences and communicates purpose in a succinct and organized manner that is appropriate for context, time, and place.
