*As with all design and construction projects schedule indicated above is an estimate only. Many factors can cause delays in the delivery of the project, and schedules are subject to change.

Brief project description

This project will remove non-ADA compliant concrete and existing tree grates. Removed items will be replaced with new planters, landscaping, irrigation, and ADA-compliant concrete. This project will also add new trees to the front of the library, both increasing the tree canopy and reducing heat in the area. This is a partnership project between the Denver Public Library, Denver Parks & Recreation Forestry, and Denver Parks & Recreation Design and Construction.

Existing streetscape to be revitalized.
