Location of Shingles to be replaced above first floor

Not visible from street view

It is the client’s responsibility prior to or during construction to notify the architect in writing of any perceived errors or omissions in the plans and specifications of which a contractor thoroughly knowledgeable with the building codes and methods of construction should reasonably be aware. Written instructions addressing such perceived errors or omissions shall be received from the architect prior to the client or client’s subcontractors proceeding with the work. The client will be responsible for any defects in construction if these procedures are not followed.

TruWood Designer Shake® Lap Siding

Your facade is more than just a pretty face. With TruWood, you can give it a Tru personality. TruWood Designer Shakes® 1/2 in. Lap Siding offers irresistible style, authentic redwood appearance and numerous design options at significant savings over cedar. Available in 8-9 lengths, TruWood Designer Shakes® is also much easier to install than the traditional "tile shingle at a time" method, for ease and convenience. Add a distinctive accent, create architectural appeal and long lasting quality. Make your house a home with Tru appeal.Specification Cut Sheets
