

PARK MAINTENANCE FACILITIES CONSTRUCTION

PROJECT BACKGROUND

Proper facilities are critical for maintaining the City’s parks, open spaces and recreation facilities. This project will design and build two new facilities in the areas of greatest need, the Northeast and Northwest Operations Districts. Each facility will follow the new design standards and Net Zero Energy standards that Denver Parks and Recreation is pioneering for the city. Building these facilities will improve working conditions for all park operations staff, enabling them to take care of the city’s valuable assets.

PROJECT INFORMATION

Location: TBD - Northeast and Northwest
Operations Districts

District: 1, 11

Neighborhood: Various

RISE Denver Funded Amount: \$15.8 million

Designer: TBD

Contractor: TBD

ECONOMIC BENEFITS

Approximately 346 jobs (created and continued)

\$21.7 million in wages to workers

\$31.6 million in economic output (sales activity
to businesses)

PROJECT BENEFITS

Increased accessibility and safety

Improved working conditions to help engage and
retain city employees

Increased energy efficiency through compliance
with the City’s emerging Net Zero Energy standards
