As of April 3, 2024

Please be aware of the following updates to athletic field maintenance as Denver Parks and Recreation (DPR) works to hire seasonal park staff in the coming months. DPR will make every effort to maintain normal playing field standards throughout the season and any significant changes that impact field use will be communicated to permit holders as quickly as possible.

- **Mixed-Use (Grass) Fields**
  - Grass height and turf conditions may be impacted. DPR staff will do their best to meet normal standards.
  - Athletic field painting may be reduced which will result in faded lines of play.
  - Tier C Fields (View Inventory [HERE](#)) maintenance will be reduced, resulting in the likely presence of weeds between maintenance visits.
  - Athletic Field Maintenance Requests (field lining) are not being accepted for the Spring/Summer Season.

- **Ballfields (Baseball and Softball)**
  - Batter’s boxes and pitching mound maintenance will be reduced. DPR staff will do their best to meet normal DPR standards.
  - Athletic Field Maintenance Requests (field lining/dragging) are not being accepted for the Spring/Summer Season

**Can athletic fields still be permitted?**
Yes, however, athletic field maintenance service will be limited - see above for more details.

**Can I line/drag/maintain my own field?**
No. This is strictly prohibited and may result in a permit violation, administrative citation, or eviction from the athletic field and permit revocation. Please use cones to mark your fields.
