

LINCOLN TRANSIT ENHANCEMENTS AND SAFETY IMPROVEMENTS

BROADWAY STATION TO 7TH AVE

PROJECT UPDATE - FEBRUARY 2021

The City and County of Denver will be implementing safety and transit improvements along Lincoln Street between Broadway Station and 7th Avenue to improve safety and support more reliable transit service, informed by community input during project outreach in 2019 and 2020.

Coming this Spring are safety improvements that will make walking and rolling along and across Lincoln safer and more comfortable. Additionally, adjustments will be made to the outermost lanes of Lincoln to better meet community needs throughout the day (see more information on the other side of this flyer) and maximize pedestrian safety.

Some safety improvements have already been implemented including leading pedestrian intervals at signalized intersections to give those walking a "head start" to cross the street, and the re-timing of traffic signals to slow and calm vehicle traffic.
