*As with all design and construction projects schedule indicated above is an estimate only. Many factors can cause delays in the delivery of the project, and schedules are subject to change.

Brief project description

Montbello Central Park will receive a new irrigation system for the entire park, conversion of old sidewalks from asphalt to concrete, new picnic area, new pedestrian lighting throughout the park, and a new bicycle pump track near the tennis courts. Other improvements within the park include new accessible ramps and ADA improvements to existing infrastructure within the park.

The Elevate Denver Bond provided funding for the irrigation system, sidewalks, and picnic areas, and a grant is helping to fund the new pump track feature.
